Scanning a QR Code from Samsung phone

QR Codes also known as Quick Response Codes carry important information that can only be decoded by QR scanners. Fortunately, you don't need to download different applications to decode QR Codes from your Galaxy device. There are a few easy ways to decode QR Codes, with **Bixby Vision** and **Samsung Internet** or **Samsung Internet (Beta)** and through the **Camera app** simply point your camera at the code and instantly be redirected to URLs links, Geo Coordinates, contact information or text messages.

How to scan a QR code iPhone

[Open the Camera app](#) from the Home screen, Control Center or Lock screen.

1. Select the rear facing camera. Hold your device so that the QR code appears in the viewfinder in the Camera app. Your device recognises the QR code and shows a notification.
2. Tap the notification to open the link associated with the QR code.

1. You will receive your itemized receipt and it will look something like this.
